## **CERN openlab Data Analytics Workshop** <sup>[1]</sup>

### **Date:**

Thursday, 20 February, 2014 - 09:00 to 17:30

### **Location:**

[Building 31-3-004 - IT Amphitheatre](#) <sup>[2]</sup>

During the last decade, the volume of digital information gathered and stored in a wide range of fields has grown exponentially. The situation of exponential growth is foreseen to be the trend also in the near future. This fact is motivated by several factors such as the continuous increasing number of new sources and the most important the potential to derive valuable information from the data in order to guide critical decision making in a large variety of areas ranging from economy to science or engineering.

Nowadays, handling and analyzing large data sets represent one of the most challenging issues for IT departments all over the world. Therefore, the data analytics market is currently a very active topic marked by an accelerating pace of change. New trends, technologies and challenges such as Big Data Analytics, Real-Time Analytics, Information Discovery, In-memory and In-Database Analytics have emerged.

This workshop represents an opportunity to collect information and discuss about latest trends in Data Analytics technologies and methodologies in scientific and business applications from Research institutions and leading IT companies.

***\* Attendance is free, but places are limited so registration is mandatory (please use the registration form provided in this page)***
