From physics to daily life: the contribution of CERN openlab ^[1]

Friday, 26 September, 2014

Today a [colloquium](#) ^[3] was held in the CERN main auditorium featuring the experts who authored the chapters of the book ["From physics to daily life?"](#) ^[4] edited by Beatrice Bressan and published by Wiley. They presented several outstanding examples of successful cross-disciplinary technology transfer originating in fundamental physics research ? practical applications that have dramatically impacted scientific progress and consequently changed modern society. Many of these applications were developed at CERN. [Bob Jones](#) ^[5], head of CERN openlab, author of the ["Grid and Cloud?"](#) chapter of the book gave a presentation at this occasion in which he also highlighted the role of CERN openlab and its contribution to the LHC.

The [presentation](#) ^[6] is already available to you as well as [the video](#) ^[7].
