ISLAMABAD: With Pakistan becoming the first associate member of the European Organisation for Nuclear Research among Asian countries this year, young scientists from the country have already started to make their mark.

A graduate of the National University of Science and Technology (Nust) stood first at the summer internship programme at the research facility popularly known as Cern, among 45 young graduates from across the globe.

Similarly, a graduate of the Quaid-i-Azam University (QAU) has made his mark with his exceptional theoretical and experimental skills at Cern.
