CERN openlab Technical workshop ^[1]

Date:

Thursday, 5 November, 2015 - 13:30 to Friday, 6 November, 2015 - 16:00

Location:

[CERN IT Amphitheatre](#) ^[2]

During the first day of the workshop, members of the CERN openlab will give short updates on each of the ongoing openlab projects. On the second day we will present the key IT challenges to be addressed in the coming years in support of the ambitious upgrade schedule of the LHC programme. These challenges will help shape the long-term direction within which collaborations and projects can be established between CERN and the openlab commercial partners. Input and participation from CERN experiments as well as other research centres is welcome to define common use cases and collaborate on joint projects.
