Welcome to openlab.cern [1]

Wednesday, 23 March, 2016

[2]

We're pleased to announce that the CERN openlab website now has a new web address: **openlab.cern** [3]! The new [?.cern?](https://openlab.cern) top-level domain [4] reflects the Organization's international nature and global recognition.

With its history as the birthplace of the World Wide Web, CERN has always been at the forefront of computer networking. So in 2008, when the Internet Corporation for Assigned Names and Numbers (ICANN [5]) opened up applications for top-level domains to new generic names and brands, CERN registered for its own.

Find out more about the history of the web at CERN [here](#) [6].
