graceunderthesea.com

?Last week I was delighted to return to CERN for a short trip (and break from thesis writing). In front of the Globe, CERN's alumni team and I filmed an interview for CERN's newly launched alumni network. I'll post the video once it's live. Rachel Bray and I chatted about my time there, including my first visit as an INTEL Science Fair winner followed by an internship in CERN openlab, and then my transition from physics into ocean engineering (how it's not such a weird transition!). We also gave a plug for my talk in February at CERN's first-ever alumni conference, where I'll tackle the subject, ?What is the role of scientists in building a sustainable future for the planet?? Spoiler alert: I'll focus on the big questions a CERN-for-the-ocean could answer! (My 2014 op-ed for TIME explains more fully my vision for a CERN-for-the-ocean.)
