CERN openlab / Intel - Winter 2012 Numerical Computing Workshop ^[1]

Date:

Tuesday, 7 February, 2012 - 09:00 to Wednesday, 8 February, 2012 - 17:00

The workshop is targeted people with good programming experience who would like to understand and control the floating-point calculations in their scientific programs.

? Some of the topics are:

- Advanced Floating point computing on x86
- Pitfalls in High Energy Physics software
- Floating point control in Intel Software
- Future directions in accuracy control
- Hands-on tutorials

The workshop is organized by CERN openlab and Intel for users affiliated with CERN, **free of charge at this time**. Registrations are based on a first-come first-served basis. Please note that for the hands-on labs **you need to bring a portable computer** with you to access the servers that will be used for the exercises. Go to [indico](#) ^[2] in order to register. All registrations will be confirmed by e-mail ? a registration in indico is required and **does not yet guarantee a place in the workshop**.
