EM 10g Grid Control – Current Status

- Upgrade EM to 10.2.0.4
  - test environment has been refreshed and prepared for upgrade

- Automated Agent Installation
  - nearly all machines have 10.2.0.3 agents
  - using RPM's to automate installation

- Automated Application of Monitoring Templates
  - is live and working fine

- Management Plug-ins for CVS & J2EE
  - started to use the Management Plug-in functionality to integrate custom targets (early stage)

- Metrics / User-defined Metrics
  - technical aspects have been covered (CPU, Memory,...)
  - moving to the service level / start to monitor business aspects (tracking the batch processes, get alerts when they run longer, get trends)
