Big Data for Healthy Living Summer School opens for registration

Share

MSc or PhD students (in the fields of clinical research, molecular biotechnology, biochemistry, physics, applied mathematics or related fields) and professionals (from healthcare, life sciences, medtech, biotech, pharma, IT industries and patients' associations are invited to apply for the EIT Health [Innovation on Big Data for Healthy Living](#) (IBD4Health) Summer School.

The summer school will give students the opportunity to work with some of the latest biomedical technologies and see how advanced IT solutions, particularly in large-scale data processing applications, could be used to promote healthy living and active ageing. Also included in the programme are visits to the CERN Openlab facilities

[Innovation and Business Creation Summer School](#)

The Innovation and Business Creation in Health Summer School will...

and experiments with other research laboratories and companies.

The IBD4Health summer school will be a transformational experience, helping students to develop the transferable skills necessary for successful innovation and potentially leading to follow-on projects in home organisations. It may even provide the inspiration to become an entrepreneur in cutting-edge biomedical computing technologies.

IBD4Health is built on case studies, which serve as a focus for open courses, lectures, hands-on activities and interdisciplinary group work based on the collaborative resolution of clinical problems. During the IBD4Health School, innovative scientists and high tech start-up companies will discuss the ideas of participants with highly qualified professors and young entrepreneurs.

It will explore different aspects of venturing and starting a company by visiting innovation labs and incubators. Students will be introduced to creative thinking, and have a unique opportunity to promote (pitch) ideas in front of a business panel, with the chance for further development of promising teams, and potential links to the EIT Health Accelerator.

When: 27 June - 06 July 2016

Where: European Scientific Institute, Archamps Technopole (Geneva airport, Suisse)

Application procedure: Students should go directly to our website to register and apply: <http://www.biohealth->
