CERN's Particle Smashers List Their Toughest Tech Challenges

May 22, 2014 - 2:03pm| Originally submitted to http://rss.slashdot.org/~r/Slashdot/slashdotScience/~3/AmkGcwnIB8Q/story01.htm

An anonymous reader writes "Researchers at CERN have detailed some of the big technology problems they need to solve to help the Large Hadron Collider (LHC) solve some of the fundamental questions about the nature of the universe. 'You make it, we break it' is the CERN openlab motto which looks at emerging tech: data acquisition, computing platforms, data storage architectures, compute management and provisioning and more are on the to do list."
