CERN NEWS : OPENLAB

The fourth phase of the CERN openlab partnership to tackle exascale IT challenges for science Geneva, 9 May 2012. The fourth phase of CERN openlab was officially launched during a meeting of its board of sponsors taking place at CERN on 8 and 9 May. CERN openlab is a unique public-private partnership between CERN and leading information technology companies HP, Intel, Oracle, Siemens with contribution from Huawei. Its mission is to accelerate the development of cutting-edge solutions to be used by the worldwide community working on LHC data.

The Large Hadron Collider (LHC), the world's largest particle accelerator, generates hundreds of millions of particle collision each second. The record, storage and analysis of these vast amounts of collisions present a massive data challenge: the LHC produces roughly 20 million Gigabytes of data each year.

CERN openlab was created more than 10 years ago, to develop innovative, advanced IT systems required to cope with the unprecedented computing challenge of the LHC. It b... ... [plus](#)
