Intel, as a CERN openlab Partner, Congratulates CERN and the LHC community for the Progress on the Higgs Boson Particle

NEWS HIGHLIGHTS

Intel is a key technology partner supporting CERN in processing and distributing the massive data coming from the Higgs boson search.

CERN openlab is an important partner of the Intel Labs Europe Network demonstrating Intel's commitment to R&D in Europe.

GENEVA (SWITZERLAND), 4 JULY 2012 – Intel Corporation congratulates CERN, the European Organization for Nuclear Research, and the LHC community on the progress on the Higgs boson search. Intel is proud to partner with CERN through joint research to accelerate the development of innovative solutions used by the worldwide LHC community and hence to participate in the quest for the most coveted physics particle – the Higgs boson.

- [Chip Shot: Intel DCM Offers Schneider Electric's StruxureWare™ Precise Management of Data Center Power, Thermal Consumption](#)

Today, Schneider Electric, a global specialist in energy management and one of two IDC "market leaders" in data center infrastructure management (DCIM), announce Schneider Electric's StruxureWare™ will soon feature aggregated power and thermal data from Intel® Data Center Manager (DCM). While global

"The CERN team, which unites some of the most authoritative thinkers and physicists worldwide, always impresses us with its research," said Christian Morales Intel Vice President and General Manager, Europe, Middle East and Africa. "Intel is proud to be a technology partner with leading edge products and technologies to support the research around Higgs boson and look forward to working with CERN on unlocking even more mysteries of the universe."

Intel has been a major contributor to CERN openlab since 2003 and has been working with the researchers by participating in joint research and providing access to pioneering hardware and software technology to help them better understand the impact of massive amounts of data in a real world grid environment.

"CERN openlab is an amazing test environment where both scientific discoveries and technological innovation can be strongly validated," said Stephen Pawlowski, Intel Senior Fellow, Chief Technology Officer, Datacenter and Connected System Group and GM Intel Architecture Group. "We are proud to be a member of CERN openlab, which is an important partner of the Intel Labs Europe Network, and this collaboration strengthens Intel's commitment to European R&D".

About Intel

Intel (NASDAQ: INTC) is a world leader in computing innovation. The company designs and builds the essential technologies that serve as the foundation for the world's computing devices. Additional information about Intel is available at newsroom.intel.com and

companies currently deliver proprietary DCIM products, this is the industry's first agreement between two major global leaders to produce non-proprietary DCIM products to meet the growing demand for granular power data that is based on actual consumption, not on rated or estimated data. The first integrated product begins shipping in later this month.
