Seagate Technology plc (NASDAQ:STX), a world leader in storage solutions, announced today it has entered into a three-year partnership with CERN openlab to collaborate on the development of the Seagate Kinetic Open Storage platform. The partnership aims to help

CERN, the European Organization for Nuclear Research, to better manage and store the 100 petabytes of data the Large Hadron Collider has generated to date, as well as the additional 2-3 petabytes of information it produces on a monthly basis in its quest to further humanity's understanding of the universe.

“CERN creates a truly astonishing amount of data on a daily basis, and finding secure and efficient ways to store that information is one of the most important challenges we face,” said Alberto Di Meglio, Head of CERN openlab. “We are excited to collaborate with Seagate on understanding how the Kinetic storage architecture could potentially contribute to the CERN infrastructure and aid the very demanding LHC program, by reducing complexity and operational costs in our storage systems.”

The Seagate Kinetic Open Storage platform restructures the traditional storage server architectures from the bottom up, connecting object-oriented applications directly to

New Release of Quest Toad for Oracle Offers Enhancements to Reduce Risk

By Liz McMillan

yourfanat wrote: I am using another tool for Oracle developers - dbForge Studio for Oracle. This IDE has lots of usefull features, among them: oracle designer, code competition and formatter, query builder, debugger, profiler, erxport/import, reports and many others. The latest version supports Oracle 12C. More information [here](#).

the storage device. By cutting out the many layers of hardware and software used in traditional stacks, Seagate Kinetic improves performance while significantly cutting costs – by 15-40%.

“This is a thrilling opportunity for Seagate to collaborate with CERN to more efficiently operate one of the most extreme and demanding storage environments in the world,” said Scott Horn, vice president of marketing at Seagate. “We believe our partnership will not only deliver extensive benefits to CERN’s large-scale storage system, but also help us further enhance the Seagate Kinetic Open Storage platform by testing it in an unparalleled data creation environment.”

CERN openlab, which is now entering its fifth three-year phase, is a unique public-private partnership between CERN and leading ICT companies. Its mission is to accelerate the development of innovative new solutions to be used by the worldwide LHC community. CERN openlab provides companies with a framework to test and validate cutting-edge information technologies and services in partnership with CERN.

A second, future research project between Seagate and CERN will look at CERN’s EOS storage system to determine whether there are opportunities to enhance and improve the system.

About CERN

CERN, the European Organization for Nuclear Research, is the world's leading laboratory for particle physics. It has its headquarters in Geneva. At CERN, physicists and engineers are probing the fundamental structure of the universe. They use the world's largest and most complex scientific instruments to study the basic constituents of matter – the fundamental particles.

About Seagate

Seagate creates space for the human experience by innovating how data is stored, shared and used. Learn more at www.seagate.com. Follow Seagate on [Twitter](#), [Facebook](#), [LinkedIn](#), [Spiceworks](#), [Google+](#) and subscribe to our [blog](#).

Cloud Computing & All That It Touches In One Location Cloud Computing - Big Data - Internet of Things SDDC - WebRTC - DevOps

Cloud computing is become a norm within enterprise IT.

The competition among public cloud providers is red hot, private cloud continues to grab increasing share of IT budgets, and hybrid cloud strategies are beginning to conquer the enterprise IT world.

Big Data is driving dramatic leaps in resource requirements and capabilities, and now the Internet of Things promises an exponential leap in the size of the Internet and Worldwide Web.

The world of SDX now encompasses Software-Defined Data Centers (SDDCs) as the technology world prepares for the Zettabyte Age.

Add the key topics of WebRTC and DevOps into the mix, and you have three days of pure cloud computing that you simply cannot miss.

Delegates will leave Cloud Expo with dramatically increased understanding the entire scope of the entire cloud computing spectrum from storage to security.

Cloud Expo - the world's most established event - offers a vast selection of 130+ technical and strategic Industry Keynotes, General Sessions, Breakout Sessions, and signature Power Panels. The exhibition floor features 100+ exhibitors offering specific solutions and comprehensive strategies. The floor also features two Demo Theaters that give delegates the opportunity to get even closer to the technology they want to see and the people who offer it.

Attend Cloud Expo. Craft your own custom experience. Learn the latest from the world's best technology. Find the vendors you want and put them to the test.

See you in Silicon Valley!
