The CERN openlab summer student programme invites 2013 applications! ^[1]

Thursday, 24 January, 2013

The openlab student programme is open for applications from bachelor, master and PhD students in computer science and physics. Successful applicants will spend two full months (nine weeks) at CERN, during the period June to September 2013, to work with some of the latest hardware and software technologies.

The programme is more than just a summer at CERN: it can lead to follow-on projects at the home institute and may even inspire entrepreneurs in cutting-edge computing technologies. A series of lectures by experts in various domains of CERN related to high-throughput computing, and study tours to universities and CERN facilities are also part of the programme.

All nationalities are welcome to apply, as long as the home institute supports the application.

The students receive a 5500 CHF stipend for their nine weeks stay, sponsored by CERN and the CERN openlab industrial partners.

Please visit <http://test-static-05.web.cern.ch/summer-student-programme> ^[2] for more information. Candidates should submit their application at www.cern.ch/jobs ^[3] and attach the following documents: CV, recommendation letter(s) by university supervisor(s), and motivation letter with an indication of preferred area of work (incomplete applications will not be considered). The closing date is 31 March 2013.

Thanks for passing this information on to students, institutes and contacts that you may have in this area!
