## **Registration for the Numerical Computing workshop is now open!** <sup>[1]</sup>

Wednesday, 24 April, 2013

CERN openlab and Intel are pleased to announce a third instance of the Numerical Computing workshop, scheduled for May 27<sup>th</sup> and 28<sup>th</sup> at CERN. The course will be taught by external experts and several CERN staff. The workshop is targeted at attendees with good programming experience who would like to understand and control the floating-point calculations in their scientific programs.

Attendance is free, as for the regular openlab workshops, but requires registration in EDH <sup>[2]</sup>. If you don't have EDH access, please let us know by e-mail that you're planning to participate ([openlab.workshops AT cern.ch](mailto:openlab.workshops@cern.ch)). A laptop is needed for accessing the servers that will be used for the exercises.

More information about the speakers along with the topics discussed at the workshop can be found here <sup>[3]</sup>.
