people1847.rssing.com

CERN's IT department has been selected as a winner in the 'Open Data Center Project' category at the EMEA awards. These awards recognise outstanding individuals, teams, and projects in a number of categories related to data centres. CERN's submission was an investigation into whether or not it was feasible to share the Open Compute Project more widely, and whether it could be opened to public procurement. Read more about the project and the submission on the CERN openlab website
