Computing Security ^[1]

Date:

Thursday, 6 July, 2017 - 13:30 to 15:30

Location:

[31-3-004](#) ^[2]

In this lecture, Sebastian will present the computer security risk landscape of an international research laboratory, overview various motivations behind attacks, and explain how these threats are addressed at CERN. He will then go into details of several types of vulnerabilities, and incidents affecting CERN in the past - and will discuss lessons learnt. The lecture will conclude with a summary of possible future trends, and ways of responding to them.
