From CERN: ?Fermilab joins CERN openlab, works on ?data reduction? project with CMS experiment? ^[1]

Date published:

27 Nov 2017

Outlet:

sciencesprings.wordpress.com

Fermilab, the USA's premier particle physics and accelerator laboratory, has joined CERN openlab as a research member. Researchers from the laboratory will collaborate with members of the CMS experiment and the CERN IT Department on efforts to improve technologies related to ?physics data reduction?. This work will take place within the framework of an existing CERN openlab project with Intel on ?big-data analytics?.
