Announcement of the Intel / CERN openlab workshop on Advanced Parallelism ^[1]

Friday, 22 June, 2012

The next instance of the Intel / CERN openlab workshop on Advanced Parallelism will be held on the 3rd and 4th of July at CERN. The modern computing era has seen an explosive growth of parallelism inherent in computing chips. Taking advantage of these new features is an opportunity, but also a challenge. To better prepare for the road ahead, Intel and CERN openlab are organizing an advanced workshop focused on parallel programming and tuning of software. The two day event, led by experts from Intel, will be split into two parts.

Full details can be found [on the event page](#). ^[2]
