Are you a bachelor's or master's student in computer science, mathematics, engineering, or physics? Do you have a strong computing profile, and would be interested in working on advanced ICT projects at CERN during summer 2017? If so, we have just the solution for you... the CERN openlab **Summer Student Programme**.

CERN openlab is a unique public-private partnership that accelerates the development of cutting-edge solutions for the worldwide **LHC** community and wider scientific research. Through CERN openlab, CERN collaborates with leading ICT companies and research institutes.

## IZDANJA MREŽE MIRA

Translate »

Over nine weeks (June-August 2017), the CERN openlab summer students will work with some of the latest hardware and software technologies, and see how advanced ICT solutions are used in high-energy physics. The students will also **attend a series of lectures** prepared for them by ICT experts at CERN, in addition to the main lecture series for **CERN summer students**. **Visits** to the accelerators and experimental areas are included in the programme, as well as trips to other research laboratories and companies.

CERN is a place where dizzying ICT challenges abound. The CERN openlab Summer Student Programme may lead to follow-on projects in your home institute, or it may even inspire you to become an entrepreneur in cutting-edge ICT.

**Apply** by 15 February and open a world of possibilities!
