For more than a year, Rackspace and CERN openlab have been exploring the feasibility of federating OpenStack clouds. Great progress has been made, such as the inclusion of code in OpenStack Icehouse to federate identity in multi-cloud environments.

Rackers Drew Cox and Alan Bush caught up with CERN's Tim Bell and Racker Chris Jackson this week for a live Google Hangout from [OpenStack Summit Paris](#). Tim and Chris talked about the federation work that's being done and shared their thoughts on OpenStack, the community, the cloud and the Summit.

Here's [a full recording of that Google Hangout](#):

And there are still two more live Google Hangouts to come:

On Wednesday, November 5 at 10 a.m. CST Drew and Alan will chat with Rackers James Denton, who literally wrote the book on OpenStack Neutron networking, and Phil Hopkins about what's new and what to expect in Neutron. You can watch it live here:

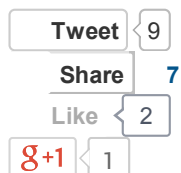

<https://plus.google.com/events/c90cv0oi7le7bidpp0s6ucbc1fo>.

On Thursday, November 6 at 10 a.m. CST they'll connect live with Racker Bryan Thompson to discuss [production-ready application stacks for Rackspace Private Cloud](#). Tune in here:

<https://plus.google.com/events/cuusc42qgm2luqbcal3p8412s8>.

In a previous show, Drew and Alan caught up with Rackers Kevin Jackson and Justin Shepherd to discuss what's new in Juno, OpenStack's tenth release. [Watch that Hangout here](#).
